2)	For mixtures containing fragmented expanded clay (> 10 weight %), the proportion must be declared. ⁹ Special particle sizes must be allocated to one of the three types of expanded clay in consultation with the quality commission. The declaration of the particle size must reflect the reference values of the standard sets of DIN EN 13055-1:2002 sieves. Compliance with these values is checked as part of quality assurance. ⁹ For fluoride contents of ≥ 2.5 mg/l, the following declaration is possible: "Not for fluoride-sensitive plants."
